

#### CLASS LEADING ENERGY EFFICIENCY

Warm, secure and beautiful aluminium-hybrid windows.

### STRONG AND SECURE

Introducing a window that is 25% more thermally efficient than the competition.

Built around a belief that beauty doesn't have to compromise performance, WarmCore aluminium-hybrid windows were created out of a desire to combine the desirability and durability of aluminium with unparalleled insulation. The unique, full width thermal core is key to why WarmCore windows are 25% more thermally efficient than traditional aluminium systems.

Strong and secure, WarmCore windows come with multi-point locking, internal beading and are backed by a 10 year product guarantee - helping keep you and your home safe. Available as casement or tilt and turn windows, and with a flush sash option that brings the outer frame perfectly level with the opening part of the window - WarmCore windows are the perfect warm, secure and beautiful addition for your home.

Built with a revolutionary thermal core at its heart.

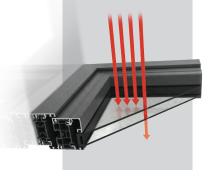

# MODERN WINDOWS FOR MODERN LIVING

The warmer choice that saves you money.

windows has been the aluminium itself The traditional weakness of aluminium

lessen this heat loss. thermal break of less conductive material to by replacing a section of aluminium with a small systems try to overcome this inherent weakness and with higher heating bills. Most aluminium finds an easy path outside, leaving you colder energy. Meaning that the warmth from your home material, aluminium is a good conductor of While a beautifully strong and hard-wearing

material - WarmCore is 25%\* more efficient structural rigidity. grade aluminium, positioned to add the greatest strength as the outer faces of the profile are high at keeping heat in your home than traditional core - maximising the use of lower conductivity as possible. Built around a full width thermal aluminium solutions. Yet it doesn't compromise system was designed to be as thermally efficient inception this revolutionary window and door WarmCore took a different approach, from

## BEAUTIFUL AESTHETICS

With built-in versatility.

Whether you are tucked up inside watching TV with your WarmCore windows protecting you from the elements, or have your windows flung wide open on a hot Summer's day you can be assured your high performance aluminium-hybrid windows will look pristine.

With clean, modern lines, WarmCore creates windows with a refined and understated beauty. Perfectly suited to modern architecture as well as replacement projects, from large fixed pane 'picture windows' to windows with multiple openers, WarmCore has it covered.

Attention has even been paid to how the window sashes look when open, with the black full-width thermal core creating a neat and thought-through appearance.

#### Tilt and turn

For the ultimate in versatility the WarmCore system is available as a tilt and turn window.

Ideal for use in upstairs locations, tilt and turn windows can be titted inwards for ventilation - helping keep your home aired and fresh, alternatively they can be swung inwards for cleaning, or for when the day is too glorious to be locked out. Using the latest multi-point locking, and custom-designed hinges, tilt and turn windows are as safe and secure as the rest of the WarmCore range.

# UNCLUTTERED AESTHETICS

# The clean and contemporary styled flush sash.

WarmCore casement windows are available in a 'flush sash' option for the ultimate in clean, modern aesthetics.

Using a stepped outerframe, the sash - the opening part of the window - sits on the same plane as the rest of the window, creating a pure, cutting-edge look to this high performance window system.

In addition where two flush sashes meet, WarmCore uses a feature mullion - which echoes the flush sash feature, creating a precise bead line in-between the two windows.

# COLOUR & STYLE OPTIONS

# A different finish inside and out.

#### Colour

Available, as standard in a choice of 15 eyecatching powder coated colours and 6 stunning woodgrain foils, WarmCore also allows you to pick a different colour for each side of your window. Want a colour outside with white inside to leave you free to change your interior in the future? – with WarmCore that's no problem.

#### Style

A choice of 2 external sash and outer frame designs enable you to personalise WarmCore windows to suit the style of your home. Pencil Round styling helps to give a softer aesthetic, while Square styling creates a precise contemporary look.

## Powder coated colours

Light Admiralty Grey BS 381C 697	Telegrey 2 RAL 7046	Pure White

Масоге	Honey Oak Super-Matt

### Style options

Pure White and Anthracite Grey are available in both Pencil Round and Square profiles, all other colours and foils are available on Square profile only. Please note, the colours and finishes shown in this brochure are as close as the printing process allows. Product specification may be subject to change without notification as part of product improvement.

# THERMAL PERFORMANCE UPGRADE

Triple glazing - for ultimate thermal performance.

Robustly designed to take the weight of triple glazed units as standard, choose this option for the ultimate thermal performance - at least 75% better than standard double glazed aluminium windows.

Opting for 44mm triple glazing rather than standard 28mm double glazing reduces the whole window U-Value rating from 1.3 to 0.8. Triple glazing is ideal for WarmCore windows installed in exposed locations.

Better thermal performance than standard double glazed aluminium windows.

## Weather performance

Q-Lon polyurethane foam seals ensure exceptional weather performance, keeping draughts and wind driven rain outside, and you and your family warm and snug.

Rubber gasketed beads provide a secondary weather seal, helping WarmCore to comfortably exceed the requirements of BS6375-1; the classification for weather tightness on windows and doors.

#### 10 YEAR GUARANTEE AS STANDARD

Designed to stand the test of time.

From the design of the unique thermal core to the 70-80 micron powder coat finish on the aluminium (marine grade is 60 microns thick), WarmCore windows have been designed to stand the test of time.

All fixings used are chosen to resist corrosion - and multi-point locks and purpose designed hinges have been precision engineered to perform consistently every single time, year on year.

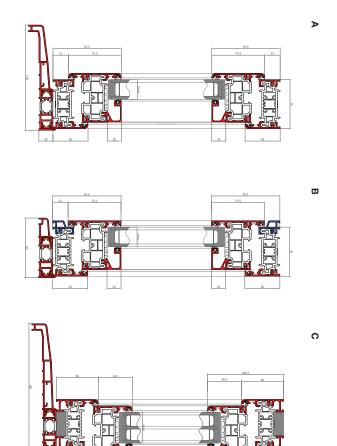

In keeping with this attention to quality, WarmCore windows carry a 10 year guarantee - covering material, profile integrity and surface finish. So you can feel confident in your decision to add WarmCore windows to your home.
